

2017-12-08 system update

??ID??: 128 | ??: ??? | ????: Mon, Dec 11, 2017 10:36 AM

New Features:

1. Store Template : Full width top banner - User can change font color of banner title.

eBay Store Designer

motor store temp

The screenshot displays the eBay Store Designer interface. On the left, a preview window shows a store template with a blue header banner that reads "YOUR MOTOR IS IN YOUR ONLINE SHOP". A red box highlights this banner. Below the banner, the template includes sections for "Pre-defined Layout main Banner", "Feature Products", "Eazy Gallery", and "Display Listing". On the right, the settings panel is visible, with a red box highlighting the "Full-Width Top Banner" option, which is currently turned "ON". Other settings include "Theme Style selection", "Store General Page Setting", and "Front Page Specific Setting".

Changed:

1. When creating a new datasheet or changing category for an existing datasheet, SoldEazy will show every suggested item specification name in the item spec part, so that users may enter new values for these specifications. Please be noticed that filling up item specifications correctly might increase the chance of being searched on search engines, and we strongly recommend you use the suggested item specifications.

Edit Item Specific

The selected ebay category has the following Item Specifications:

Brand Required

Style Required

UPC Required

Remark:

If **Brand, MPN** or **GTIN** are required, but you don't have, you must enter the following values:

For **Brand**: "Unbranded"

For **MPN, UPC, EAN, ISBN**: "Does not apply"

filled in automatically

	Name	Value	
Item Spec1	Brand		+ Add Item Spec
Item Spec2	Style		✘
Item Spec3	Material		✘
Item Spec4	Color		✘
Item Spec5	Closure		✘
Item Spec6	Size		✘
Item Spec7	Pattern		✘
Item Spec8	Country/Region of Manufacture		✘
Item Spec9	UPC		✘
